Intelligent products for smart pool owners.™

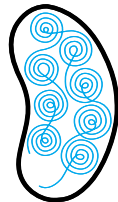

AUTOMATIC IN-GROUND POOL CLEANER

Navigator® Automatic Pool Cleaner for In-Ground Pools

Plunge Into A Sparkling Clean Pool...
Automatically.

The cleaner that knows where it's going.
The Navigator is truly a smarter cleaner. Employing our exclusive SmartDrive® programmed steering, Navigator systematically attacks every square inch of your swimming pool. Cleaning it faster and far more effectively than the random-pattern movements of unintelligent automatic pool vacuums.

SmartDrive®

In-take throat captures microscopic dust and pollen to larger debris.

One voracious appetite for dirt and debris.
Navigator features a specially designed intake throat. Which means it can easily vacuum microscopic dust and pollen to larger debris. Taking an even larger bite out of pool cleaning maintenance.

Navigator model 905C for concrete pools.

Navigator model 905V for vinyl-liner pools.

The optional Leaf Canister interconnects in-line, trapping leaves and debris before reaching your pool's filter system. Its see-through design lets you know when to empty.

The optional Skimmer Vacuum Plate automatically alternates between vacuuming the pool and skimming the pool's surface with each cycle of the filtration system's time-clock.

This creature has advanced features.
Navigator provides you with easy, trouble-free operation. You never need to empty or replace debris bags. And because it runs off your existing filtration system, you don't need an energy-consuming booster pump.

Durable construction ensures years of trouble-free operation.

Excellence backed by a heritage of leadership.

When you choose Navigator, you not only select superb technology, you also benefit from the knowledge and commitment that the industry's leading manufacturer can provide. Only Hayward offers swimming pool and spa owners the compatibility of The Total Hayward System™ — a comprehensive, coordinated family of quality-designed and precision-crafted recirculation products.

Optional Accessories...
